

# CUSTOMER SUCCESS STORY

Aerospace MRO Industry

## CHALLENGE:

- Current Storage Rack is cumbersome to load/unload and requires two operators
- Reduce Part damage and presentation
- Need ability to transport between operations

## SOLUTION:

- Design Kitting Cart to secure parts
- One-person load/unload easily
- Cart can be pushed or tugged between operations without damaging parts

## IN THEIR WORDS

*“The team loves the new Blade Kit Carts from Geolean. A single operator can now load/unload the parts with less risk of damaging the blades. Parts are now properly secured in the cart so they can be transported between processes in the plant. This solved several process and ergonomic issues for the engine line”*

*-- satisfied aerospace MRO client*

## RESULTS

Productivity	Part Defects	Reduce Personnel	Reduce Scrap
<b>+30%</b>	<b>-20%</b>	<b>-50%</b>	<b>-100%</b>
